

REGEN FACETECH (RFT)

The most advanced yet cost effective Facial Restoration and Regenerative Cellular Technology on the market today

Rapidly reverse GLP-1 drug induced aging

- ✓ Activate Stem Cells
- ✓ Reduce Wrinkles
- ✓ Firm Skin

ReGen Medical RFT

Portable, Painless. Non-invasive. Needle free. No downtime

WHAT IS REGEN RFT?

The most advanced yet cost effective Facial Restoration and Regenerative Cellular Technology on the market today. ReGen RFT is so revolutionary in facial care that it literally reverses years of aging in the face and neck area of the body. It's changing the way we age our faces with a new, non surgical facelift. ReGen RFT Magnetic Face Synchronized Thermal Energy (Heat energy) reshapes and smooths the skin by heating the dermis and increasing the level of collagen and elastin fibers. The high-intensity pulse magnetic (High pulse) technology restores and enhances the support of facial tissues by selectively contracting muscles and increasing the density and quality of muscle structures. The immediate result is fewer wrinkles on the face, and a natural lifting and firming of the face.

Synchronous use of two powerful patented technologies, heat energy and high-intensity pulse magnetism, can tighten the skin, reduce wrinkles, lift the face, turn back time, and make the face look youthful.

Synchronous Thermal Energy **SKIN**

- Simultaneous emission of unipolar thermal energy and high-intensity
- Pulsed magnetism Evenly heated layers
- Active area across the entire magnetic sheet = even heating
- Dynamic Impedance Technology

High Intensity Pulse Magnetic **MUSCLE** **MUSCLE**

- High-intensity pulsing magnetics delivered in sync with synchronous thermal energy stimulates facial muscles
- Allows for hypermaximal contractions and muscle twitches
- Transduced motor neuron membrane depolarization
- Signals travel along neurons to contract the muscles

Synchronous Thermal Energy **High Intensity Pulsing**

- Strengthen facial musculature
- Affects the facial fascia which supports the soft tissues of the face
- Improves skin texture and smoothness

Benefits of ReGen RFT

- Non-invasive, non-surgical facelift
- Needle-free and non-invasive
- Free of Fillers and Toxins
- New experience and comfortable
- Reduce wrinkles
- Lifts sagging skin
- Face slimming
- Increases collagen and elastin
- Simple 20 Minute Treatment
- Activate Stem Cells

State of the Art Facelift. Restoration. Rejuvenation

Painful procedures and downtime are so yesterday.
ReGen RFT is your best look now.

MAGNETIC PULSE SAFETY:

"Magnetic stimulation has magnetic field-assisted conduction, and current can pass through various biological tissues with almost no resistance."

REGEN FACETECH (RFT) FACIAL REVOLUTION

System Specification ▼

Model	ReGen RFT
Operating handle	3 Patches
Power	100-220V50/60Hz
Electromagnetic wave energy	0-3T
RF frequency	1M
Screen	15.6-inch touch screen
Pulse	200µs (microsecond)
Chassis size (CM)	57x37.6x90cm
Packing weight (KG)	84KG
